

Guest notice

Dear guests,

During the summer months, especially in periods of extreme heat, Ribarska Banja has problems with its water supply, which results in the water being cut off for all residential buildings outside the Ribarska Banja Special Hospital.

We, the hosts, have been fighting for better conditions for years, but we have no influence over these cut-offs, and we are often not even notified in time — conditions we consider absolutely unacceptable. In our experience, the water is most often off on Mondays (when the water in the Wellness centre is changed), and it usually comes back during the evening or night. This is not a rule — most Mondays pass without a cut-off — but it is worth being prepared, especially if you arrive in Ribarska Banja on a Monday.

Our advice for the hot summer months: after using one of the pools at the Special Hospital, bring your washing kit with you and take a shower in the pool shower cabins. We will do our best to provide bottled drinking water (although we are not obliged to), as well as containers of non-potable water (which you can use for the toilet).

If at any point you run out of water (drinking or non-potable), the fountain in the centre of the spa grounds always has drinking water where you can refill your supplies.

More information about water cut-offs and reconnections is available at the gatehouse (barrier) at the entrance to the Ribarska Banja Special Hospital.

We apologise in advance for any inconvenience and promise to keep fighting for better conditions.

Your hosts
